### OVERVIEW

Wilson Sonsini represents digital health companies and their venture investors in nearly all areas of health tech, including telehealth and telemedicine, mobile health and wellness apps and platforms, healthcare data analytics, wearables, medical devices, wellness products, digital therapeutics, data/AI drug discovery, and precision medicine.

Our multidisciplinary team provides comprehensive support in all areas critical to digital health companies' growth and success, including:

- Company formation
- Healthcare regulatory advising and corporate practice of medicine structuring
- FDA pre- and post-approval counseling
- Venture capital financings
- Commercial transactions
- AI development and utilization
- Patents, trademarks, and intellectual property protections
- HIPAA compliance and healthcare data privacy
- Litigation and enforcement
- Mergers & acquisitions
- Initial public offerings (IPOs)

With a focus on emerging companies, Wilson Sonsini has robust experience navigating legal risks associated with the use of the most cutting-edge technology in healthcare. These technologies often outpace the legislatures and courts tasked with regulating them, requiring advice that balances legal, ethical, and business needs. Our team offers creative solutions to compliance obstacles tailored to

the company's stage, size, and risk tolerance, with rapid turnaround times and cost-effective advising, including fixed-fee pricing options.
