CLIENT HIGHLIGHTS

March 12, 2026

On March 10, 2026, Thinking Machines Lab and NVIDIA announced a multi-year strategic partnership to deploy at least one gigawatt of next-generation NVIDIA Vera Rubin systems to support Thinking Machines' frontier model training and platforms delivering customizable AI at scale. In addition, NVIDIA has made a significant investment in Thinking Machines to support the company's long-term growth. Wilson Sonsini Goodrich & Rosati advised Thinking Machines on both the partnership and the investment.

The partnership between the companies also includes an effort to design training and serving systems for NVIDIA architectures and broaden access to frontier AI and open models for enterprises, research institutions, and the scientific community.

The Wilson Sonsini team that advised Thinking Machines on the transactions was led by [Rezwan Pavri](#), [Colin Conklin](#), and [Chris Paniewski](#), and included [Courtney Matteson](#), [Jackie Jung](#), [Mackenzie Tobin](#), and [Parris Bass](#).
